Sites of public hearings and waste routes

TRANSPORTATION SAFETY
Shipping 70,000 truckloads of radioactive and chemical waste increases risks to citizens along Oregon and Washington highways.

PUBLIC HEARINGS
will begin at 7:00 PM.
Pre-hearing informational workshops will be held by Heart of America Northwest and other public interest groups beginning at 6:00 PM in Spokane, Portland and Seattle. (Look for our signs at your public hearing location).

Public Participation Threatened: Take Action Now!
USDOE is hastily pursuing its goal to make Hanford a National Radioactive Waste Dump. They have continuously denied requests for an extension on the SWEIS comment period, even though there are over 3,000 pages of text to analyze before public meetings begin.

Come to a meeting! Send in your comments today!

To get involved in stopping the Hanford National Radioactive Waste Dump, call Heart of America Northwest at (206) 382-1014 or visit www.heartofamericanorthwest.org

Your participation is needed NOW more than ever.

Fill out the postcard to the left, tear off, affix stamp and mail.

Thank you!

This product was funded through a grant from the Washington State Department of Ecology. While these materials are reviewed for grant consistency, this does not necessarily constitute endorsement by the department.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

Dear Sir:

I have lived my life in Washington State for 59 years and have been listening to information "Clean-Ups" on Hanford for over 25 years.

Enough is enough -

No more waste shipments

The job should have been completed by now -

I want a good environment for my children

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

Our Columbia is one of the GREAT RIVERS of the WORLD

I cannot comprehend the ignorance and outright crass carelessness

that have prevailed at Hanford, (in this "Scientific Age")

1 All these mistakes should be cleared up - not more added.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

The most desirable situation is to simply end the production of nuclear waste. Is the power generated worth the life-threatening pollution? Yes, absolutely not!

But the reality is that for now anyway, there is nuclear waste. To add this to an already seriously contaminated site & endangered region is not acceptable. We need to spread the waste around... so all regions are contaminated equally.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

I sincerely hope that the lives of my grandchildren and their children will not be threatened by the actions we take today. I think we should be cleaning up Hanford, not burying more radioactive waste. And, let's not endanger ourselves by transporting it on public highways. PLEASE be responsible in your actions.

Dear Mr. Collins, IF USDOE WERE A USED CAR DEALER, I'D SHIP ELSEWHERE.
I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment:

- 1| ENOUGH RADIOACTIVE WASTE DUMPED IN WASHINGTON!
- 2| ENOUGH GROUNDWATER CONTAMINATION!
- 3| ENOUGH LEAKING CONTAINERS.
- 4| ENOUGH UNFULFILLED CLEANUP PROMISES!
ENOUGH BUREAUCRATIC DELAYS!
ENOUGH ~~BUREAUCRATIC~~ BUREAUCRATIC FUNDS WASTED ON FEES, NOT CLEANUP!
- 5| ENOUGH RAIL & HIGHWAY SHIPPING RISKS!
ENOUGH HEAD-IN-THE-SAND ATTITUDE ABOUT EXISTING WASTE!
- 6| ENOUGH HEALTH AND ENVIRONMENTAL RISKS!
- 7| ENOUGH TALK & REPORTS, NOT ENOUGH CLEANUP.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1| I agree with Citizens groups believing a commitment was made by the EPA and USDOE to clean up all soil and groundwater to allow true unrestricted public access to the Hanford Reach by 2018. The recent strategy released by the Tri-Parties does not call for cleaning up groundwater so that this contamination will continue to enter the Columbia River - my family and friends want you to commit!! to groundwater cleanup - for ^{your} children's sake and future - FUTURE!!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 | As a parent whose 22 year old
son died in 1975 as a down wind
victim I urge no more wastes at
Hanford.

Currently I work as a historian on
at the Queen of the West, Portland to
Lewis & Clark, I am aware of concern regarding
impact on the food chain.

Please add no more radioactive waste
at Hanford

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 | Hanford already is the most contaminated
site in the country. We here in Washington
State and Oregon are greatly concerned
about adding more contaminated waste
to the area. We are alarmed by the plan
to ship 70,000 loads of radioactive waste
to Hanford. (truck)

- 1 I want you to tell people the
 Truth about the mess we are in.
 We should never have done this. It
 CAN not be contained or disposed of.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 The citizens of Washington are committed
 to the clean-up of Hanford's nuclear
 waste. Adding more waste will make the
 job even harder & more costly. There are
 2 better ways to handle the waste so that
 groundwater contamination is avoided.
 3 Please plan to bury the waste somewhere
 closer to its origin - avoiding the dangers
 inherent in long-distance transport.

Thank you for your prompt consideration.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 Do not allow more radioactive waste to
be dumped at Hanford! Hanford is
2 a catastrophe that should be cleaned
up and shut down forever - before any
more damage can be done.

- 1 How long is the gov't going
to mess around at Hanford
and not do anything? They
have been spending millions
yet nothing gets done.
Now this! Pathetic!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 No additional waste should be
dumped in the Hanford area -
The risk to the inhabitants
is TOO GREAT.

2 I own property close to the
Hanford Reservation and it is a
threat to my health -

When driving thru the area at
dusk - The earth gave off a LIGHT
????

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 Stop the Radioactive Waste
Dump at Hanford.

We have been subject to
the lies at Hanford for 50+
years. We have lived in Wenatchee
all our lives - therefore worry
about current & future health
risks. What about the Columbia River -
what about the Ocean! So sad!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 I do not understand why my government is deliberately try to add to the problems of cleanup at Hanford. Why is the government willing to risk human health by contaminating the water of Columbia River?

2 What liability insurance will be taken out by the gov't to pay for tragic accidents along the highways as waste is moved?
